

Viabundus Applied – Call for Presentations

Online workshop and release version 1.2

September 21st 2022

Do you use the Viabundus pre-modern street map in your research, or would you like to?
Sign up for the online event at info@viabundus.eu

Viabundus is a freely accessible online street map of late medieval and early modern northern Europe (ca. 1350-1650), including:

- Land routes and inland waterways
- Information about towns, tolls, staple markets and other information relevant for the pre-modern traveller
- A fair calendar

On the occasion of the launch of version 1.2 we would like to get to know you, your work and your ideas. We welcome 10 minute-presentations about all kinds of research that could be performed with the aid of the Viabundus data, from experienced as much as early career researchers and students.

Sign up to discuss your work and ideas **before September 9th**.

Registration for participation is also possible afterwards.

- * What is the data used for?
- * What methods are applied?
- * What difficulties do you encounter?
- * What insights might be gained?

The 'Viabundus Applied' exchange of experience will be preceded by the release of Viabundus map version 1.2, which contains improved and expanded data on the Netherlands and Denmark.
